

Discover the next generation safety footwear

Dunlop® Construction Range

July / August 2021

Empowering Construction Workers

Safety gear is continuously evolving to improve worker safety

Over the years traditional leather safety gear such as helmets, gloves and jackets all got surpassed by superior modern-day solutions

Solutions made from materials that are:

- Lightweight
- Waterproof
- Durable

Empowering Construction Workers

For safety footwear, leather still remains a popular choice

Their tough look and premium pricing imply strength and comfort, likely to last a lifetime

In reality, leather is a heavy and stiff material that is vulnerable for cracking, especially in wet conditions

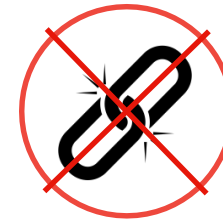

Leather boots are not waterproof (S3) and require significant upkeep to keep them in peak condition

Lightweight

Waterproof

Durable

Cut resistant

Empowering Construction Workers

Leather boots are often worn well beyond their intended lifespan and no longer providing sufficient protection

Fortunately there are better solutions available that provide full protection, exceptional fit and superior comfort in any situation

GUARD-Series

Dunlop PRO-Series

The new Purofort FieldPRO and RigPRO raise the standard for allround performance

Key USP's

- 1 Powered by Purofort**

Dunlop's superior Purofort material is lightweight, flexible and strong, guaranteeing maximum comfort and protection with a superior lifespan
- 2 Walks like a Sneaker**

The revolutionary Snugfit last and new Comfort Insole offer comfort and support on a whole new level, previously experienced only in modern-day sneakers
- 3 Superior grip & traction**

The SRC rated Professional outsole with tread wear indicators, guarantees excellent grip and traction on any terrain and in any condition

Dunlop VIBRAM-Series

The Purofort Reliance and Expander are equipped with a Vibram® Rubber Outsole for maximum grip on any terrain

Key USP's

- 1 Powered by Purofort**
Dunlop's superior Purofort material is lightweight, flexible and strong, guaranteeing maximum comfort and protection with a superior lifespan
- 2 Durable Purofort+ last**
The Purofort+ last has a modern design and is developed to offer long-lasting comfort for its wearers
- 3 Maximum grip & traction**
The VIBRAM outsole is made from volcanic rubber to offer maximum grip & traction on any terrain, especially

Dunlop SNUGBOOT-Series

The Snugboot WorkPro & Craftsman offer extraordinary comfort that has never been experienced in a wellington before

Key USP's

- 1 Breathable Purofotex Upper**
The unique Purotex is made from a 4-layer material that is waterproof from the outside, but breathable on the inside for prolonged comfortable wear
- 2 Walks like a Sneaker**
The revolutionary Snugfit last and stability fix ensure the Snugboot offers extraordinary fit and comfort
- 3 Superior grip & traction**
The SRC rated All-Terrain outsole guarantees excellent grip and traction on any terrain and in any condition

Dunlop GUARD-Series

The new Acifort MetGUARD offers maximum protection for when the hazards of an environment demands it

Key USP's

- 1 Certified Metatarsal protection**
The new MetGUARD is the first Dunlop boot to offer EN-certified Metatarsal and Ankle protection, making it an excellent choice for hazardous environments
- 2 Revolutionary comfort**
The new MetGUARD is the first non-Purofort boot with the Snugfit last and new comfort insole, offering more comfort than any specialty PVC boot in the market
- 3 Excellent grip & traction**
The SRC rated outsole with tread wear indicators, guarantees excellent grip and traction on any terrain
